

Joseph Hahn

Summary

Passionate Software Engineer with a proven track record at Nucleous and Engineering with IT, specializing in developing innovative solutions and enhancing application efficiency through multithreading and scalable design. I excel in collaborative environments, driving project success through functional testing, impactful feature development and productive client interactions. I am self-motivated and consistently approach problems with a "can-do" attitude.

Experience

Nucleous (Now Engine) | Bentonville, AR **Software Engineer II | 01/2025 - Present**

- Developed new features in both WPF and Blazor Hybrid desktop applications resulting in significant efficiency over existing customer processes and legacy software.
- Found and resolved high-impact bugs affecting customers
- Travelled onsite to resolve technical issues
- Implemented automated testing to improve code resiliency and QA
- Participated in an effective Agile sprint planning cycle
- Evaluated and provided feedback to other engineers on Pull Request reviews
- Worked on ground up UI/UX redesign for Vue 3 micro-frontend web app.

Nucleous (Now Engine) | Bentonville, AR **Software Engineer I | 08/2022 - 01/2025**

Engineering with IT | Gravette, AR **Software Engineer | 01/2022 - 08/2022**

- Spearheaded development of a customizable, web-based alcohol menu system for bars and restaurants
- Built a custom JWT authentication system for enhanced security and convenience for customers and admins
- Collaborated with other engineers to determine suitable hardware that met the clients needs
- Frequently met with clients to provide status updates and define project requirements and ensuring customer satisfaction through continuous software delivery cycle
- Built and tested an Android app using Java which ran on the Android TV platform
- Managed an Entity Framework, code-first database for product and customer data

Engineering with IT | Gravette, AR **Software Engineer Intern | 06/2021 - 01/2022**

- Built an internal CRM tool using SQL and .NET Core
- Collaborated with software engineers to develop and test application procedures for system efficiency

Skills

C#, UI/UX, Agile, Automated Testing, Python, Javascript/Typescript, SQL, Entity Framework, Vue, React, React Native, Public Speaking, Space Planning, SolidWorks, MATLAB

Education

John Brown University | Siloam Springs, AR **Electrical Engineering**

Completed Coursework in Electrical and Computer Engineering

- Placed 2nd in a JB Hunt sponsored hackathon
- Placed 1st in university business pitch competition
- IEEE Member. Competed and placed in the top 10% in the IEEE Xtreme programming competition

Awards

Eagle Scout
